Editor's Introduction

You can probably tell by the size of the issue (over three hundred pages) that we are getting a lot of excellent submissions to the journal. Occasionally we try to keep costs under control by keeping the page count around two hundred. But this time the accountants are not ruling the day; there is too much good material to print.

This isn't a theme issue. Indeed, the topics run far and wide. But we do start out with a sizzling book symposium on Howard Sobel's tremendous work, *Logic and Theism*. My colleague at Biola University, Doug Geivett, organized a panel discussion on this book at the Pacific Division of the APA in the spring of 2005. The participants then agreed to put their remarks in writing for the special exchange we present here. I am grateful to all of them for taking time to rework their comments for *Philosophia Christi*.

Before reading the symposium, though, you may want to first digest William Lane Craig's review essay on the book (go to page 481). The title of Craig's essay, "Sobel's Acid Bath for Theism," would win at least honorable mention in the provocative title category if we offered such awards.

We are already busy putting together the next issue, and it looks to be another groundbreaking collection of essays and reviews. We will go to the mat with the accountants to print all the pages necessary to tell the whole philosophical story. The accountants have been working out at the gym, so we don't yet know who will win. Keep your subscriptions current to find out.
